PROMOTERS & TEAM

KRITA RENEWABLES PRIVATE LIMITED (KRITA) [Formerly “VISTRAP POWER PRIVATE LIMITED”) is a company head quartered in Chennai, India is focused in Renewable Energy Sector. KRITA is promoted and managed by a Senior Team having more than 200 years of combined experience in the fields of renewable energy namely Solar, Biomass, Small Hydro, Wind etc. including in Product/Technology Development, Project Management, Manufacturing, Supply Chain, Resource mobilization, Corporate Affairs, etc.

FOCUS SEGMENTS

KRITA’s focus areas are **Execution of Solar EPC (Rooftop/Ground-Mounted Projects), Battery Management Solution, Development of Wind Turbine Generators, Owning Wind / Solar IPP projects through SPV with investor and selling green energy to reputed corporates.** The combined market opportunity for KRITA’s businesses is more than 25 billion US\$.

SOME BRIEF MILESTONES FOR KRITA’S BUSINESSES IS GIVEN BELOW:

- KRITA will provide total EPC solution both for Rooftop (KW) and Ground Mounted (MW) Solar Projects. KRITA will initiate project execution from Tamil Nadu and will expand to other States gradually and will enter in to overseas market by the 5th year. It aims to achieve to be one of the top 5 solar EPC solution providers in India.
- KRITA’s Battery Solution business will cater to Wind, Solar, Green Hydrogen Power, EV segment etc. and will aim to achieve one of the Top 5 companies in this segment by the 5th year.
- KRITA will develop in the first two years, highly efficient, cost effective 1 MW, 1.86 MW Wind Turbine Generators for the repowering market and by the end of the 5th year, 6 MW Wind Turbine for the IPP market. KRITA will export its Wind Turbine for the overseas market from the 5th year onwards. KRITA aims to achieve Top 5 position by end of the 5th year.
- KRITA is expected to develop and own Solar / Wind IPP projects through SPVs with multiple investor and cumulatively own 700 MW approx. by end of the 5th year. The green energy generated from these projects will be sold to reputed corporates to achieve maximum financial return on investment.

STRATEGY & FACILITIES

- KRITA will identify suitable partner for technology transfer/joint venture in the Battery Management Solution Segment.
- KRITA will set up suitable manufacturing facilities for Battery, Hub, Nacelle Assembly and Blade near Chennai having access to all infrastructure facilities.
- KRITA will adopt the best international practices like SIX SIGMA, JIT etc. in its manufacturing/assembly processes.
- KRITA will start exports from the 5th year onwards to African, South American, Middle-East and South-East Asian Countries etc.
- KRITA will have a highly qualified, experienced and efficient team. It will have a very lean and efficient business processes by having effective ERP packages from SAP/ZOHO/MICROSOFT to bring vibrant, efficient business processes.
- KRITA’s core strength will be having a very superior R&D team having highly qualified, experienced and efficient members. This team will continuously develop highly efficient, cost effective technology for its present and also for new businesses. KRITA will have association with premier research institutions in India and overseas.
- KRITA intends to create value for its stakeholders by listing the company in LSE/BSE by end of the 5th year.

FEASIBILITY ON FINANCIALS

- The financials are considered on conservative estimates with no escalation in price as well as cost is considered.
- The project execution time for Solar EPC is maximum of 6 to 12 months depending on the project size and does not need any capex except for working capital.

FEASIBILITY ON FINANCIALS (CONTD...)

- For Battery manufacturing, KRITA is in the process of identifying suitable technology.
- For WTG, the product to market timeline is a maximum of 1.5 years and KRITA has already identified the design consulting agencies, suppliers including probable place of manufacturing.
- With KRITA team's rich experience, it does not foresee any difficulty in scaling up its operations including adding project capacities.
- KRITA's projected financials is less than 5% of the total market potential.
